

# Additivo Elettrostatico

## Electrostatic Additive

### PRODUCT DESCRIPTION

Solution of well selected compounds in order to make 2K enamels and clearcoats be polarized by electric fields used by the spray guns of the electrostatic painting systems.

### MIXING

Add the product in to 2K fillers, enamels and clearcoats with a proportion of about 20 g per litre. The right proportion depends on the specific electrostatic system used. This additive can cut down the pot-life of the products.

### APPLICATION

After mixing, catalyze and dilute the product as referred by technical data sheet.

### TECHNICAL DATA

Colour	Transparent
Density	0.90 Kg/l
Shelf life	2 years in original tightly closed containers away from direct sunlight and excessive heat. Min storage temperature: 18°C. Max storage temperature: 35°C.

### CLEAN UP

Clear the equipment carefully with Nitro thinner I 040.

### SAFETY PRECAUTIONS

#### FOR PROFESSIONAL USE ONLY

- Use only in well ventilated areas
- In case of insufficient ventilation, wear suitable respiratory equipment.
- Wear suitable gloves and wash hands immediately after work.
- Comply with the standards in force as to waste disposal.
- See special instructions or safety data sheets.
